## HIGH-SPEED INTERNET ACCESS

The Fairmont Vancouver Airport offers high-speed Internet access in all of our meeting rooms (a nominal charge applies). Our high-speed Internet access is delivered via a state-of-the-art Ethernet network. You can surf the Web, check e-mail, download files, or enjoy a "VPN" (Virtual Private Network) connection to your company's server with your laptop. Best of all, the system is "plug and play"—guests simply plug in their computers, reboot, and go.

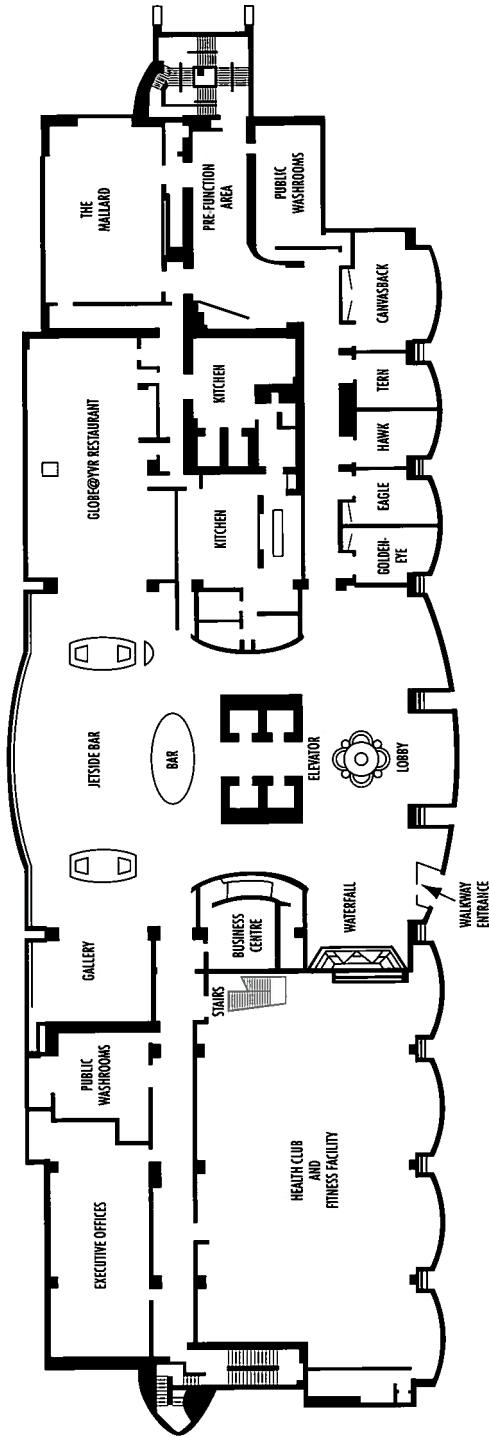

## MEETING ROOM INTERNET ACCESS

Our meeting rooms are equipped with a minimum of two connection points for Internet access, which can be expanded to numerous connections to set up multiple workstations for on-line training or other activity. Guests may supply their own computers; however, with advance notice the hotel can source the equipment locally and have it set up for your arrival.

## AUDIO VISUAL

We offer a complete list of state-of-the-art technology in communications and audio-visual equipment. All arrangements may be made with our Sales Services Department.
